## Supplement, Not Supplant Procedures

---

Title I funds may not supplant – public education services that are to be provided to all students. At Old Colony Regional Vocational Technical High School, Title I funds only supplement and to the extent practical, increase the level of funds that would, in the absence of Title I funds, be made available from the non-federal sources for the education of eligible children participating in the Title I Program.

MCAS results and other objective educationally related criteria are assigned points in the Student Selection Workbook. The workbook is calculated by grade and subject. The total number of points is used to rank order eligible students. Students who are in the greatest need, and/or who are at most risk of failing are scheduled in English, Mathematics and Science classes, respectively, with a paraprofessional present or co-teacher.

Eligible students may also be assigned to MCAS remediation and subject area prep classes. These classes are in addition to the students' regular English, Mathematics and Science programs.

Federal Entitlement funds (II and IVA) can also be used for professional development, technology and classroom material resources used in such supplemental programming. The professional development provides for pedagogy and teaching strategies, which will enhance instruction and thereby, improve student achievement. The professional development funds are used to ensure that all teachers are licensed and paraprofessionals are highly qualified. All students are held to the same high standards and expectations.

The Title I Director will disseminate this written policy and procedure to all administrators and Title I staff in the district. Following such dissemination, the Title I Director will meet with administrators and all Title I staff to ensure a clear understanding of the concept of Supplement Not Supplant and the appropriate procedures enacted to adhere to this policy.
